Theft of Service	Up to \$500.00 per day

WATER RATES: If the City of Corsicana increases its water rates to B&B, B&B will pass these charges to its members, as implemented by the COC.

DROUGHT FEES: During moderate drought situations, the COC has calculated an average water usage for a household to be 7,000 gallons per month during this period. The COC will bill B&B a surcharge of \$2.00 per 1,000 gallons for water used in excess of 7,000 per household. Households in excess of 10,000 gallons will pay \$5.00 per 1,000 gallons above that amount. During severe drought conditions, the COC has calculated an average water usage for a household to be 5,000 gallons per month during this period. The COC will bill B&B a surcharge of \$2.00 per 1,000 gallons for water used in excess of 5,000 gallons per household. Households in excess of 7,000 gallons will pay \$5.00 per 1,000 gallons above that amount. Households in excess of 10,000 gallons will pay \$10.00 per 1,000 gallons above that amount. Therefore, B&B, when necessary, will pass this surcharge on to B&B customers whose usage exceeds these amounts. In addition to these changes, if the COC further increases the surcharges to B&B, B&B will pass these surcharges to its members as implemented by the COC.

 Randall Scott, President B&B Water Supply Corporation
